The Democratic Presidential Debates

All participants agreed in principal to the following:

First, Donald Trump is the Firstborn Son of Satan and has destroyed the United States. He must be put in jail either before his term ends through impeachment or after leaving office following conviction by a mob.... er Kangaroo Court with a jury comprised of Hollywood Celebrities. Aw shucks, who needs a jury, somebody get a rope!

All immigrants from anywhere in the world are welcome here without the need of paperwork, identification, background checks, health checks, or any other documentation. All borders should be open without restrictions and the current policing force will be replaced with a kind of "Welcome Wagon" for all comers including instructions on how to acquire free housing, free food, free healthcare, etc. Authors Note: Maybe this information could be shared with the homeless living on the streets of Los Angeles, San Francisco, Sacramento, Portland, Seattle, etc. ??

Everybody, whether citizen or not, is entitled to "free" lifetime healthcare. Authors Note: Many candidates called for "Medicare For All" without noting that Medicare is not "free", at least to

current participants.

Free College for everyone (citizens and non-citizens) with the added bonus of debt forgiveness for some 1.5 Trillion Dollars in outstanding Student Loans.

Unrestricted "Free" abortion for all with one candidate calling for free abortion for Transgender males who become pregnant. It was left unclear how long after natural birth the mother could still elect to abort the child, a few hours, a few days, third grade?

The planet only has 12 years left unless all Americans immediately discontinue all use of fossil fuels and convert to only electric powered vehicles. No mention was made that to re-charge an all electric vehicle you must "plug in" to the power grid which is incapable of completing this task if said power grid is totally sourced by solar and wind power, at least within the next 30-50 years.

I look forward to the day when all working Americans get home from work on a July day when it is 105 degrees, plug their electric vehicles in for a re-charge and then walk into their air conditioned home during the hottest part of the day.

It was also not mentioned that the World's major polluters (beginning with China & India) have "deferred" their own participation in the Paris Climate Accords till "at least" 2030 or beyond. Further, there is no mechanism in place requiring penalties or enforceable legal consequences on any participating country who ignores these "feel good" "Global Accords".

One participant unveiled his plan to give every resident in America (legal citizens and non-citizens) \$1000 per month. When asked how this would be paid for he said with a "value added" tax paid for by everyone which would return the money to government - at least that is what I heard.

Lots of other "free" stuff all to be paid for by taxing the greedy rich and corporations. Authors note: You could not pay for all of these "freebies" if you taxed all of the rich at 100% and it is also a fact that corporations don't really pay taxes, their customers do. Corporations pass along tax increases to their customers in the form of higher prices.... they have to, or go out of business.

Santa Claus may as well close up shop and lay off his Reindeer - He can't compete with this bunch!

Bob Bandy - July 2019
